

# PRODUCT PROFILE

## Blended Methanol Products

Mycotoxin extraction is made simpler with J.T.Baker® brand solvent blends now available for use with the VICAM® spectrum of mycotoxin testing products. Eliminate awkward mixing and pouring and facilitate consistent results every time with premixed solutions. Three ratios of methanol:water mixture are available in volumes and packaging that are designed to simplify mycotoxin analysis.

### Key advantages of the J.T.Baker solvent blends for VICAM customers include:

- **Ease of use**—the convenient dispensing system eliminates awkward pouring and measuring
- **Consistency**—the high quality of the J.T.Baker products facilitates consistent, reliable results
- **Cost Savings**—consistent, reliable results eliminate costly rework
- **Enhanced Safety**—the reduction in chemical handling and storage enhances safety in the laboratory

VICAM		
PART NUMBER	PRODUCT DESCRIPTION	SIZE
100000211	Methanol:Water 80:20 Solution	20L
100000212	Methanol:Water 80:20 Solution	4L
100000213	Methanol:Water 60:40 Solution	20L
100000214	Methanol:Water 60:40 Solution	4L
100000217	Methanol:Water 70:30 Solution	4L
